Kuwait City, Kuwait

Client

Private

Estimated Cost

5 850 000 EUR

Stage

Scheme design

Area

4050 m²

The Blue Ocean Boutique Mall is a shopping centre, located in Kuwait City, which houses multiple commercial and service spaces in its six storeys.

The first four storeys are dedicated to commerce, including a supermarket that occupies the entire ground floor and twenty shops distributed over the three floors above. The second to last storey is dedicated to restaurants and the last storey holds services and companies, featuring several office spaces, meeting rooms and other related areas.

This new shopping centre formally constitutes a simple glazed volume in the shape of a rectangular prism, wrapped in an outer perforated metal skin. This skin implements sunshine control for the building and its interior spaces and contributes to the definition of a contemporary and appealing architectural piece.
