

# EXPANSION OF KEMIN PHARMACEUTICAL DIVISION

2014

## Location

Oeiras, Portugal

## Client

Kemin Pharmaceutica

## Estimated Cost

985 500 EUR

## Stage

Scheme Design

## Area

1095 m<sup>2</sup>

The project to expand the facilities of Kemin Pharmaceutica was born of a need to increase the area of the existing building and of the will to expand to new functions and spaces.

Considering the full occupation of the original facilities, this project proposes the development of a new volume, in continuity and in harmony with the existing building, with formal autonomy and evident contemporaneity.

The expansion takes the form of a rectangular prism, in the same alignment as the original building, with distinct elevations surrounded

by transverse portal frames. These frames both serve a structural function and implement sunshine control for the glazed fronts beneath. They also promote privacy in the adjacent compartments.

The project developed new facilities in this building, serving the functional purpose of the expansion, such as: laboratories, production units, auditorium, new work areas – in closed offices and open-space – and other complementary spaces.
